ТВОРЧЕСКОЕ ЗАДАНИЕ

I agree with opinion that Chat GPT and other AIs may lead humanity to the downfall of education and critical thinking because AIs are just programmes that was built by people ~~but~~ and ^{these} ~~thes~~ programmes become smarter everyday. You do not have to write an essay by yourself anymore, you just have to give a task to the Chat GPT and it will write an essay by itself without you.

Nowadays people do not have to read a lot of books to get a good education, they just need to give a task and ~~permission to~~ pay monthly fee and Chat GPT will do all researches that you want without you. All these sort of things that I have described is just a beginning of Chat GPT. We do not know what will happen in ten years.

Chat GPT is just a programme without feelings. Engineers train Chat GPT by downloading tons of textual information into their networks. It means that all these AIs such as Chat GPT ~~are~~ ^{are} just programmes that get smarter with every minute.

In conclusion, I want to say that if we want to save our future generations from downfall of education and critical thinking, we have to replace ~~by~~ Chat GPT by more harmless programme.
