ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays, AI has become a ^{significant} ~~meaningful~~ part of our lives. We ~~usually~~ can not imagine our mundane routine without smart technologies and, especially, without chat GPT. But can this instrument lead a society to the downfall of education and critical thinking? Views on this topic are quite controversial. In my opinion, using chat GPT can not lead to the degradation in the sphere of education and self-development.

To begin with, the technology of chat GPT has its imperfections. We know that chat can ~~fit~~ easily solve problems, connected to the writing of text, ~~but~~ not the problems in mathematics and economics, for example. Moreover, if a person uses chat GPT he has to check all the facts to make sure they are true, and the piece of writing makes sense. This way, ^{the activities of} critical thinking and problem-solving are still being developed, so we can not ~~talk~~ say that we ~~will~~ see a downfall in the sphere of education.

Secondly, using chat GPT to make the process of education easier can lead to increase in time that person can spend to explore something new and broaden the horizons of studying. This way you can make chat GPT do the tasks which are boring and not useful in terms of studying and ~~spend~~ time learn things more effectively.

To sum up, chat GPT can ^{make} the process of learning easier, but the usage of this technology
