ТВОРЧЕСКОЕ ЗАДАНИЕ

With the rapid development of astronomy, the idea of discovering other civilizations is becoming more and more realistic, rather than a sci-fi myth. ~~with~~ It arises a controversial question: should we contact them, and if the answer is yes, then to what extent?

I believe, not establishing any communication with them would be a vital mistake which would prevent the history of mankind from ~~getting~~ getting on a completely new, advanced chapter.

However, it is essential to be exceptionally careful\*. First, we should consider whether the civilization is possibly dangerous to the Earth. Second, we should find out whether we ourselves oppose any threat to them. For instance, they may be not developed enough to fully comprehend what will be happening, or simply not intelligent enough to learn human means of communication. Like that, the contact will ~~be~~ not be fruitful and, per chance, even fraught with harm to both sides.

Depending on this, ~~the~~ the biggest possible amount of contact should be established. It will be ~~not~~ a grand step forward not only in science, but in the entire development of humanity.

\*when doing so.
