ТВОРЧЕСКОЕ ЗАДАНИЕ

In my opinion, Chat GPT is a great way to cut corners for students nowadays. Since it trains on a lot of different data, it's very good at giving a "base" for whatever work you'd like. And now a student's and pupil's "education" mainly consists of doing the same things that have been done before in a format you are not allowed to alter in any way. I think education is what's really ruining young kid's critical thinking skills. On top of that Chat GPT can also be used as a way for you to figure out what kind of words or how you'd like to express your idea. And since it's trained on a lot of different types to express the same idea. I honestly think that it is a wonderful way to help kids do what is necessary but unwanted and free the time for them to have fun and grow more as people. If you really think about it, education is what really grinds ~~that~~ children's minds into a work obsessed paste. And almost every couple of years learning becomes more and more hard! What will happen to our future generations?
