ТЕСТ. БЛОК 2.

10-11 классы

Вариант № _____

16	1) The obscurity lent him courage to keep his eyes fastened as ardently as he liked upon the girl who sat in the firelight, 2) She was confidently waiting for him to declare himself and she meant to accept him, 3) talking of indifferent things which plainly were not the things that occupied their thoughts 4) Of course, I do want you to understand... ...but it makes so much difference to me what you think of - of me.	he liked to declare
17	1) For two weeks. 2) It depended on a "good deal". 3) "I came in with your brother, as I often do" 4) "Hope was plainly gaining the ascendancy over misery in Brantain's guileless face" 5) "When they turned to retrace their steps, Brantain's face was radiant and hers was triumphant"	round, and hers was triumphant
18	1) give one the chance to do something wanted 2) to keep one's eyes completely at focused on something 3) interfered with, appeared in the slightest way manner 4) insignificant event 5) of a very long time	
19	1) Strongly 2) 3) repeated 4) unnatural 5) shapeless	
20	<p style="text-align: center;">Fake Love</p> The title is appropriate for the story as it implements the motive of the main characters' actions, Nathalie wanted to marry Brantain only because he was enormously rich, and because She liked "the entourage which wealth could give her." She didn't actually have any feelings for Brantain, and only wanted him for the money.

ТВОРЧЕСКОЕ ЗАДАНИЕ

Some scientists think there are intelligent life forms on other planets and messages should be sent to contact them. To what extent do you think it should be done? Write an essay to argue your point. Write between 200-220 words.

For many years scientists have ~~been~~ debated whether there are any intelligent life forms on other planets. Some state that they have solid evidence and urge ~~their~~ their colleagues to try to contact other forms of life. However, the necessity of such attempts is still arguable. I believe that trying to contact intelligent life forms is a waste of time and financial resources and shouldn't be done at all.

Although there has been minor evidence of other intelligent creatures in outer space, it is usually speculative and does not provide enough information to assume the existence of life forms on other planets. So why would humans spend money on intelligent life form research if they aren't fully sure that such forms exist? We have to face the truth: spending resources on discovering other forms of life is a waste of invaluable finances which could be spent on existing problems, such as education and healthcare.

In addition, why are humans always trying to discover things we know can be ~~so~~ incredibly dangerous? Perhaps, we still haven't made contact with other creatures for our own best. Nobody knows what problems we can face and how they will affect our planet.

To conclude, I strongly believe that we should not make attempts to discover intelligent life forms on other planets.
