20	<p>I think a good title is "Mad Love". A man who said that he wanted to divorce and then wrote: "it's okay, it was a bad day" even without regard is a mad man. And if a woman doesn't struggle, if she agrees with his words and actions she is a mad woman too. But, such type of love also might be in someone's life, so I think this title is suitable.</p>

ТВОРЧЕСКОЕ ЗАДАНИЕ

The topic of Chat GPT functions is very ^{debatable} ~~questionable~~. We can compare it with the Internet; One says - it is useful, while another - it will lead to degradation. Chat GPT can^{not} answer all your questions. If you need to write an essay for your school or another project - you can use Chat GPT. Due to the fact that he gives you answer in very structure form, it is like a plan, not a well-done strong essay. I also disagree that Chat GPT may lead to the downfall of education. If you don't know the answer on any question, you will try to search some information in enormous couple of sources: from libraries to the Internet. Almost all people use Internet when they need an answer, and our planet still have talented scientists who can programming and create such networks as Chat GPT. I strongly believe that your education wouldn't change because of the help of Chat GPT. System of education may give pupils more creative topics for discussion, so they wouldn't use Chat GPT or anyone else for help. What about critical thinking? I ~~also~~ am convinced that Chat GPT wouldn't harm our system of education. If you have a debatable topic you can't ask Chat GPT for help, because it would give you only general words about one side of the problem. And you still need to maintain the problem, ~~and~~ make a complex analyze and give your own commentaries ~~with~~ from your own point of view.

To sum up, I don't think that Chat GPT is a problem, from my point of view it is a tool, a key to information, which can help us to be better and well-prepared.
