ТВОРЧЕСКОЕ ЗАДАНИЕ

Nowadays ^{the} artificial intelligence has ~~become~~ become an essential part of the lives of people. Students, teachers, workers and scientists use it on a daily basis. While some people claim that its usage has positive sides, others argue that it leads to the downfall of education and critical thinking. In this essay I will explain my point of view on this issue.

I strongly believe that the usage of chat GPT leads to the loss of thinking and analysing which affects the educational process. First of all, chat GPT has an opportunity to write essays and compositions and people do not have to read tons of books to gain knowledge. It results in the decrease of ^{the} educational level. Secondly, chat GPT uses many advanced words so people do not need to look them up in the dictionaries. This ends with the fall of literacy and the overall educational level: people do not enrich their vocabulary or broaden their horizons. Finally, using ^{chat} GPT, people become lazier. The fact is that they do not need to spend hours thinking about essays or new projects when they can click the button and receive a perfect text.

To conclude, I suppose people have to reduce the amount of texts made by the artificial intelligence. A wise balance is essential because people need to understand the consequences of the overusage of chat GPT.
