ТВОРЧЕСКОЕ ЗАДАНИЕ

Chat GPT is an artificial intelligence which can answer any question by gathering the data across the Internet within a few seconds. Some people believe that using it might result in deterioration of ~~students~~ people's learning and analysing skills. However, I do not agree with this position.

To begin with, Chat GPT is merely a searching tool. It cannot think and work ~~by itself~~ without ~~human~~ a human's prompt; it is only able to compile and enumerate facts. In turn, what a user needs is a conclusion based on the factual basis, while Chat GPT does not provide conclusions. ~~As a consequence,~~ As a consequence, the AI users will still have to use their critical thinking skills and analyse by themselves.

Moreover, Chat GPT might present answers with factual errors. Numerous researches and ~~experiments~~ experiments have proven that AI relies on all publicly available information; it is unable to filter and exclude data from unreliable sources. Consequently, people who use neural networks will always need to check the credibility of the received information, educating themselves at the same time.

Taking everything into ~~consideration~~ consideration, Chat GPT is a useful but unreliable tool. Even though it is able to gather the data quickly, ~~people are~~
