ТВОРЧЕСКОЕ ЗАДАНИЕ

Chat GPT is quickly becoming more and more popular. Many people are eager about it, but there are some individuals who think that this technology can lead to the decline of education and decrease of critical thinking thinkers. I totally disagree with this point of view.

To begin with, chat GPT helps students improve their academic performance. This technology gives them a chance to get an answer to their questions or completed assignments in a second instead of going to the library to get necessary information. Although chat GPT is incapable of writing theses or dissertations, it is a decent tool for improving one's scores.

As for the critical thinking, chat GPT is able to answer many questions. Contrary to popular belief, this technology is developing critical thinking as people consider not only their own opinion, but they also take artificial intelligence's point of view into account. However, chat GPT is incapable of answering philosophical questions. Still, it is the best tool to develop ~~your critical~~ one's critical thinking.

To conclude, I would like to restate that chat GPT will not lead to the downfall of education and decrease of those who think critically. On the contrary, it will significantly improve scores of students at schools and universities and help ~~improve~~ to improve critical thinking.
