ТЕСТ. БЛОК 2.

10-11 классы

Вариант № 2

16	<ol style="list-style-type: none"> 1. "Quite good," said Miss Meadows, but still in a strange, stony tone..." 2. - 3. "The young girls became positively frightened", "Some of the younger ones began to cry" 4. "Must have been mad, bought hat-stand today - Basil"
17	<ol style="list-style-type: none"> 1. After reading the letter Miss Meadows appeared to be in high spirits, that's why it's probably something romantic like a love-letter, announcing her engagement. 2. Her mood changed positively and the music became joyful and warm. 3. It was hard to imagine such cold-hearted woman at first glance to be actually in love and engaged. 4. She blushed after receiving the letter and became more optimistic and ^{glowing with expression} soft.
18	<ol style="list-style-type: none"> 1. To go down a long and empty corridor 2. Mentally harmed 3. A cold and unfriendly tone. 4. To feel really unsettled and scared 5. Smiled brightly, but but with hidden and meaningful dissatisfaction.
19	<ol style="list-style-type: none"> 1. Dark 2. - 3. Returned rapidly 4. Passage 5. Depressed
20	<p>I would suggest "A life-changing letter" for a title. It seems suitable to me, because ^{Miss Meadows} after receiving ^{the} long-awaited news about Miss her Meadows' engagement, she became a different person, she started glowing with expression. Moreover, her life after will never be the same, it will change for the better, because she met her love.</p>

ТВОРЧЕСКОЕ ЗАДАНИЕ

To begin with, artificial intelligence is a relevant topic for discussion nowadays. A lot of research is being done. This scientific breakthrough changed our lifestyle completely. Therefore, is it boon or bane?

Personally, I can't fully agree ~~to this~~ ^{given} with the ~~given~~ statement. To my mind, everything depends on the way one uses this technology. It can give access to enormous amount of information in no time. People from the past century could only dream of such miracles! However, our young generation takes chat GPT for granted and doesn't comprehend that it can actually lead them to degradation.

I could give a simple example to illustrate the benefits and drawbacks. At school students have to put in a lot of effort in their studies, but whenever they miss part of the school program they can use some aid from AI to deepen their understanding of the topic. However, it shouldn't be blank copying, vice versa, they must think everything through by themselves. On the contrary, some might abuse this comfortable and time-saving technology which will lead to reduction of their mental work and downfall of critical thinking. Who would use up their energy if he or she can get easily get the necessary information fresh from the oven with minimal efforts?

To conclude, the actual enigma is finding the perfect middle. We should use AI for becoming the best version of ourselves. Let's broaden our horizons, not shrink them!
