

Евразийская лингвистическая олимпиада
Заключительный тур 2024-2025

Талон ответов

Шифр 47A 9-11

Заполняется Оргкомитетом олимпиады

АУДИРОВАНИЕ

9 класс

Вариант № 3

	a)	b)	c)	d)	e)
1	6	4	8	2	5
2	2	2	1	3	1
3	1	4	1	1	3
4	2	2	1	1	2

5	According to Matt Walker, insufficient sleep is a public-health crisis as short low-quality night rest increases the risk of several diseases and conditions, including obesity, heart issues and anxiety. One's sleep life quality is equal to their sleep quality. It is even said, that the longer you sleep, the longer you live.

9 класс

Вариант № 3

16	1 ① AS AI usage grows, so does energy demand. 2 ① In 1961, IBM scientist Rolf Landauer introduced the Landauer limit, the minimal energy required for a single computational task. 3 ② Instead of fast, sequential operations, tasks could be dispersed among numerous "tortoise" processors →
17	1 Modern computers perform millions of operations per second. 2. Parallel processing is used in AI where thousands of GPUs are running simultaneously. 3. They power thread-like molecules through nanofabricated mazes.
18	1 to remain computing speed 2 it has a downside 3 warmth distribution 4 lower requirement of power 5 to break a new ground
19	1 a miracle 2 to divide 3 calendar computing 4 to increase in proximity 5 some useful information
20	Modern computers are technological marvels but they consume too much energy. In 1961, Landauer limit was introduced which is a minimum energy for a computational task during infinite time. Scientists are trying to reach this level of consumption using biological computers.
