5	In my opinion, the biggest benefit of computer-based learning is its its adaptiveness. The algorithm will learn about its students, giving them the information and advice they'll need. It'll be like having a personal teacher. The AI may also be able to analyze and a student's traits and find where those traits would be useful.

Вариант № 1

16	1. F Many are disheartened by the lack of substantial measures from global leaders 2. T They risk framing individual distress as the problem rather than acknowledging our connection to planetary crises. 3. F asking "What has happened to you?" instead of "What is wrong with you?" 4. T Social power dynamics also influence whether individuals feel heard and included in environmental discussions 5. T Addressing climate distress requires systemic changes from governments.
17	1. Floods, hurricanes, extreme weather. 2. They fear for the future while feeling unheard and suffering daily disruptions 3. Common emotions and the influence of ^{social} social power dynamics 4. PTMF helps identify how distress responses can serve different purposes 5. It creates a space to process emotions and alleviate climate distress
18	1. Take actions to prevent death 2. Dynamics of influential power and social status 3. A bad experience that left an impact on a lot of people. 4. Change in lifestyle or focuses on preventing harm to the environment 5. Taking care of your mental and physical needs.
19	1. Impending 2. Disappointed 3. As Perceiving 4. Permanence Exclusion 5. Strengthens Strengthens
20	The looming crisis of climate change demands action to prevent loss of life. Global leaders haven't implemented substantial measures. Feeling overwhelmed is common, you are not alone. Many feel fear and while being unheard. We need to focus on climate change instead of individual emotions, create safe spaces to process emotions and make the government to take systemic measures.
