ВАРИАНТ № 3

Artificial intelligence also known as AI is taking the world by storm. Students and workers are doing their assignments with the help of Chat-GPT and this seems to be only the start.

I think the reason behind this is human laziness. AI provides ~~an~~ a simple and accessible way of getting required information in practically no time. AI also ~~provides~~ ^{provides} free things which, otherwise, would've cost a fortune. Remember those trendy colour analysis procedures that went viral on social media? With AI you needn't pay 600\$ for it, it's completely free.

~~However~~ However, the fact that AI provides a cheaper and easier way of doing things resulted in the fact that people are losing their jobs. Musicians, accountants, artists and many others have become victims to this. Is there a way to solve this problem?

I think so. At least I can suggest two solutions. The first one—creating a list of endangered jobs and ~~introducing~~ putting restrictions on AI in respective fields, rather than promoting AI as the cheaper alternative. ~~However~~ However, with the constantly ~~the~~ evolving technology, it's only a matter of time until AI takes over certain jobs completely. With that, my second solution is to embrace AI. People should ~~be~~ treat AI as a helper, not an enemy. This way jobs will evolve with technology and humanity will prosper.
