ВАРИАНТ № 1

~~Nowadays~~ Nowadays we may see in many parts of the world the lack of food ~~on some~~ and that is a real problem that humanity facing.

What are the main factors that cause such problem? I think that food's shortage in some countries might be caused by ~~country's~~ country's stability. In my point of view, ~~the~~ unstable country's position can be seen in poor countries with low level of development, for example, some African countries are facing that. I think that ~~such~~ this happened due to long period of colonization by countries of "the first world" (like Britain, France). As a result, countries which depended on bigger countries were not able to develop on their own, most of their resources were transferred to Europe, ~~so~~ so this caused a lack of resources in African countries.

I think that to solve this problem several steps ~~can~~ should be taken:

Firstly, some worldwide organisations may be created to control situation with food in different countries and make an action through economy to deal with the problem.

Secondly, some voluntary campaigns might be organized, so they could ~~also~~ ~~also~~ help people suffering from the lack of food and share food resources.
