4	4	1	3	1	1

5	The educational process may be negatively affected by the lack of properly developed technology essential for proper delivery of computer-based learning. Such technology has not yet been developed as more time is being spent discussing the possibilities of AI learning, rather than actually working on it. This fact may ruin the whole educational process.

ТЕСТ. БЛОК 2.

9 класс

Вариант № 2

16	1. F justification : 2-nd sentence 2. T justification : 4-th sentence 3. F justification : 8-th sentence 4. F justification : 12-th sentence 5. T justification : 18-th sentence
17	1. The person who used to suffer from maths anxiety. 2. It is useful because it improves one's results in maths. 3. In a traditionally-phrased way. 4. It decreased after standard questions and increased after mathematical mindset ones. 5. It can be improved by presenting problems with multiple solution paths or visual elements.
18	1. to have an some effect on a person's of opinion of themselves 2. a mindset that allows for flexibility 3. not to possess enough evidence connected with the study of brains 4. patterns that allow for different solutions of one problem 5. a habit that one can get rid of
19	1. difficult 2. less-talented 3. to deal with 4. to dispel 5. visually
20	Maths anxiety is generally believed to be impossible to overcome. Some research has been conducted, however, that proved the situation to be quite the contrary. More precisely, it proved that maths anxiety is merely a result of poor teaching and that it can be easily alleviated if treated properly.
