These days AI seems to be taking over the globe. It arises as a great concern for the humanity. However, I think it isn't as threatening as it may be presented in the mass media. AI models are still just the result of the scientific ^{and technological} progress. Therefore, they're manageable.

It's quite understandable that humans are scared of a machine riot as a lot of ^{thinkers} ~~historians~~ have fantasized about it. That GPT programmed ^{intentionally} to do complex tasks, ~~technology~~ ^{increase the} rate of unemployment cause of a substitution of manual labour workers. ~~Nevertheless~~, Nevertheless, it's vital to remember that all AI models are a product of human intelligence. Of course, the mankind is facing another crisis which also leads to depressed spirits among people, but we've ^{already} overcome several ones in history (like during the industrialization), so ~~why it~~ ^{is} the problem with this one? ~~We need to focus on building~~ ^{My point is} out career in intellectual fields in order to control the development of AI. ^{Moreover, it has raised on humans' can be characterized.} By directing force as what ~~control~~ ^{manage} ~~manages~~, ~~and foundation~~ ^{therefore}, we will only grow in our power and create a useful ally in future discoveries.

All in all, I believe AI is the key to scientific exploration, not an "enemy" in achieving scientific goals.
