4	2	4	1	3	1

5	AI can monitor brainwaves and see understand in which part of brain is more active. Thus, we can estimate of person's development. Also, it can help to optimise learning process and make it more quick. Using AI will help to revolutionise schools, make them more modern. AI AI can also make a map of each person's individual abilities. Such thing will make education more convinient and effective.

Вариант № 1

16	1. Severe floods, hurricanes, heatwaves. 2. They They feel anxiety. They are stressed and afraid of the future. 3. Almost a half of young people suffer from daily disruptions, more than a half fears for the future. 4. It offers a unique approach for coping with environmental anxiety. 5. Connecting like-minded people creates a space to process emotions.
17	1. 2. 2. 4. Social power dynamics also influence whether individuals feel heard and included in environmental discussions. 3. The power threat framework (PTMF) offers a different approach by focusing on the context of distress rather than labelling it as a mental disorder, asking "What happened to you?" instead of "What is wrong with you?". (F) 5. Addressing climate distress requires systematic changes from governments and powerful entities (T)
18	1. to stop from dying in the future 2. societal changes to better our environment to stop 3. event affecting a lot of people in a bad way 4. different approach, helping environment. 5. doing things that make you feel better
19	1. horrible 2. discouraged 3. to show 4. s 5. to help
20	Nowadays, a lot of young people suffer from anxiety caused by other natural disasters. The organisation called the power threat meaning framework (PTMF) has does researches in order to find ways to cope with "climate anxiety". To cope, we should do pro-environmental lifestyle changes. The govern government should take action too and make systematic changes.
