ВАРИАНТ № 1

It is a real problem that there is not enough food ~~for~~ for everyone in many parts of the world. I think it is because we have a bad environmental situation in ~~the~~ ^{the} world. People are not protected ~~ed~~ from floods, atmosphere effects and ~~a~~ other bad situations. And the food suffer from them too.

To solve this problem I can suggest to protect food from environmental problems. We can organise organisations that will do this. And all ~~3~~ citizens must think about our environment ~~the~~. They can sort rubbish and don't throw it out everywhere. Well, we can grow natural products in the country. It is a good resource to help with ~~the~~ solving this problem. ~~the~~ I think if everybody will grow food we will have good results with solving this problem. And if people will help to protect environment we can solve not only food problem, we can solve environmental problems too.

ВАРИАНТ № 2

I think it is a great solution ~~for~~
of both problems together. In this
case we will breath fresh air and
everybody will have food. But for this
bright future ~~we must~~ everybody must
do something to help with solving
this problem. Because in bad case
we can not solve this problem if
people will not want to do something.
