There is no doubt that wasting food is one of the most crucial problems in our society, which needs to be solved. But in order to succeed in it, we should find reasons why it happens.³⁶

There are several views on this issue. Some activists believe that the majority of people is completely unaware of negative consequences, which can occur²⁶ as a result of wasting food. Personally, I am inclined to agree with this position, as I rarely see any information considering the current problem. From my point of view, government and other eco-organisations must put more efforts to increase people's awareness. For instance, TV channels and various websites should be obliged to promote eco-friendly behaviour and include this idea in their ad.¹²⁶

Others assume that some ~~marketing~~ companies use ~~which~~ ^{marketing strategies} urge people to buy food ~~that~~ they do not really need. Indeed, manufacturers offer major discounts when customers purchase several products.¹⁵⁵ These strategies are utterly harmful for our planet because they increase food waste. In my opinion, banning these tendencies will certainly ~~lead to~~ solve the problem.

Ultimately there are multiple reasons which cause the issue, and each of them must be considered separately in order to save our world from the destruction.

20	The Determined Doctor From my point of view, this title perfectly suits the text because it highlights the determination of Dr. Baxter. She spent numerous days waiting for her husband, while others would give up. Thanks to her determination, she finally met Mr. Baxter after a long time and managed to keep her mind clear.
