ВАРИАНТ № 1

In the large amount of the ~~contries~~ areas on the Earth, people don't have so many products to feed all the citizens. There are some problems that cause this. For example, political situation influences all spheres of life. Massive ~~ex~~ riots destroy mental health, economy and the status of governmental leaders. Another reason is that the climate can't afford to grow seeds up or the ground isn't good enough. ~~For~~ Moreover, not every community understands that it should change areas where it has plants. Also, the criminal rate makes it difficult to offer people better life conditions. It may be too many people in the ~~certain~~ areas, as well.

So, I would like to suggest some ways to reduce food problems. For instance, countries can develop trade with the others. It will partly help with the lack of products and make the variety ~~of~~ of them quite wider. To reduce the crime wave the Government can pay the money to people who need it. Also, it might raise pensions and give some more preferences for children and invalids. I guess, country should try to ~~built~~ build science centres ~~which~~ which will struggle with biological problems. Moreover, we can ~~can~~ produce something that will help the plants to grow. Probably these solutions will be successful enough to get rid of that weakness.
