5	As far as I am concerned, the biggest benefit of computer-based learning is its capability to adapt to the individual needs of students. A lot of traditional teachers are overwhelmed with work and can't pay attention to every single student, while AI can explain everything and find an appropriate answer simultaneously.

Вариант № 1

16	1. T) The lack of measures from global leaders, despite numerous climate summits. 2. T) Terms like "climate anxiety" can validate these feelings, but they risk framing individual distress as the problem rather than acknowledging our connection to planetary crises. 3. F) PTMF offers a different approach by focusing on the context of distress, rather than labeling it as a mental disorder, asking "What has happened to you?" 4. T) The study reveals common emotions such as guilt,..... all valid reactions to the situation's gravity and societal dismissal. Social power dynamics also influence... 5. T) Addressing climate distress requires systemic changes from governments and powerful entities.
17	1) The visible effects of climate change are hurricanes, severe floods, and heatwaves. 2) People are anxious, distressed about the climate crisis. They feel guilt, alienation, anger. 3) the PTMF-informed study revealed common emotions that are valid reactions to the situation's gravity and societal dismissal 4) PTMF helps identify how distress responses can serve different purposes: to manage overwhelming emotions or protect loved ones. 5) The community helps people in reducing climate distress by providing them with connection with like-minded people.
