Заключительный тур 2024-2025

Талон ответов

Шифр A99305-8

Заполняется Оргкомитетом олимпиады

АУДИРОВАНИЕ

9 класс

Вариант № 2

	a)	b)	c)	d)	e)
1	4	8	5	7	3
2	2	1	3	1	3
3	4	1	3	4	3
4	4	1	3	1	4

5	One of the major computer-based negative factors is its impact on people's eyesight. Since while educating on computers, students tend to spend too much time in front of a device, which affects their eyes' health. Therefore students with poor eyesight are more prone to getting bad marks because their eyesight is not perfect.

Вариант № 2

16	1) False. "This 'maths anxiety' can seem insurmountable, becoming a lifelong issue. 2) True. This is rooted in the "mindset theory", which categorizes people into two groups: who believe their abilities are unchangeable... who think they can improve through effort. 3) False. Every mathematical problem has multiple solutions.	→
17	1) Disadvantaged students are most likely to benefit from alleviating maths anxiety. 2) By encouraging a growth mindset in maths, the aim is for students to develop these mindsets or organically through problem-solving itself. 3) The researchers phrased questions traditionally.	→
18	1) to have impact on how a person treats themselves 2) a way of thinking which can change throughout throughout a period of time. 3) to not have enough scientific facts to back up a theory. 4) a wide range of ways of solving a math problem	→
19	1) difficult 2) unskilled 3) to point something out 4) to overcome 5) easy	
20	Maths is a tough subject for many disadvantaged students, affecting their self-esteem and being insurmountable. The concept of "mathematical mindsets" aims to help students to develop their mindsets through problem-solving. To back up the theory, an experiment has been carried out, revealing that participants' motivation decreased after traditional mathematical questions.	→
