

Евразийская лингвистическая олимпиада
Заключительный тур 2024-2025

Талон ответов

Шифр A99301-29

Заполняется Оргкомитетом олимпиады

АУДИРОВАНИЕ

9 класс

Вариант № 2

	a)	b)	c)	d)	e)
1	5	8	1	7	3
2	2	3	1	2	1
3	2	1	3	2	2
4	4	3	3	1	4

5	One of the factors of computer-based learning, that may negatively affect the educational process initially seems to be its main benefit. Even though AI tools like Chat GPT are a great advancement for project activities or researches, they also help students cheat and to copy homework from the internet. Moreover, students can acquire troubles problems with vision.

Вариант № 2

16	① F. (1) ... often provoking anxiety and a sense of failure that can affect self-esteem for years. (2) This "maths anxiety" ... possibly becoming a lifelong issue. (2) T. (4) ... those with a "fixed" mindset, who believe their abilities are unchangeable, and those with a "growth" mindset who think they can improve through effort. (3) F. (8) Every math problem has multiple solutions. (4) F. (12) ... measured brain activity linked to motivation using EEG technology. (5) T. (18) With right strategies, overcoming math anxiety is possible.
17	① Those, who struggle from "maths anxiety" are most likely to benefit from alleviating it. ② By encouraging a growth mindset in maths, students can develop problem-solving skills, that are essential in this realm. (3) The researchers asked the participants to solve math problems to show that adopting a growth mindset can alleviate maths anxiety. (4) The participants' motivation increased with mathematical problem problems. (5) According to the research, learning can be improved by presenting problems with multiple solution paths.
18	① to lower self-esteem; to have a negative impact on one's self-esteem. (2) a mindset, that allows people to think they can improve through hardwork. (3) to not possess medical confirmation. (4) several ways to treat a problem. (5) a habit that can be changed or altered.
19	① difficult ② troubled troubled. ③ confront. ④ soothe ⑤ separately.
20	Many students fear the subject of maths. The so-called "math anxiety" can become a lifelong issue, leading to problems with self-esteem. However, there is a way to treat this problem by adopting a "growth mindset" that allows one to improve through effort. The researchers suggest that by presenting math problems with multiple solution paths people with math anxiety will overcome the issue.
