One cannot deny that AI has become an ubiquitous tool for different kinds of operations, ~~no matter how complicated they are~~. Obviously, it ~~creates~~ ^{has a big} influences on humanity development, since it gives a lot of opportunities to enhance both every day life and sophisticated fields of science. I would like to outline my opinion on the causes of spreading AI around the globe.

Firstly ~~of all~~, AI's popularity is definitely based on its capability for solving the vast majority of automated tasks. Regarding its ability to develop using previous demands, AI allows users to acquire the infinite combinations of dealing with ~~the~~ problems.

The second reason why AI's spreading is inevitable is the fact that the source is available from every place of the world. Connection to the world wide web makes AI the global interactive instrument.

Last but not least, most of AI-based tools are free for users. Therefore, AI becomes a part of daily-based tasks and a perfect companion for usual users.

I would suggest solutions for maintaining the spreading of AI. Despite its useful actions, the tool also can be dangerous. One should be aware of the accuracy of the information AI gives.

It is vital to check information and prove that it can be trusted. What is more, it is important to keep in mind that only hackers ask for personal

Although AI seems to be taking over the globe,
it creates new possibilities for those who use it
properly.
