ТВОРЧЕСКОЕ ЗАДАНИЕ (лист 1)

ВАРИАНТ № 3

Nowadays, it is well-known that the popularity of AI is growing rapidly. Initially, it ^{had been} ~~was~~ a useful tool and ~~interesting~~ good entertainment for everyone, but then it started being used for cheating at universities, running illegal businesses, and even harming people.

What are the reasons of this popularity? Firstly, AI became widely known because of accelerating process of globalisation: common social media have been promoting it for a very long time. Secondly, AI is actually very beneficial for people involved in creative projects, ~~the~~ artists, architects and designers. Due to these points, it should not come as a big surprise that every child now is familiar with AI.

Personally, I can suggest two solutions of the problem. First of all, the government could create laws and obligations in order to restrict usage of AI for ~~its~~ non-essential purposes. This may also include ^{making} ~~examining~~ ^{pass special exam} people and giving them ~~special~~ certificates, claiming that they are allowed to make use of the system. Moreover, we should ^{improve} digital literacy of young people by including extra ^{IT} lessons in the school's ~~curriculum~~ programs.

To conclude, the problem of the popularity of AI should be dealt with. The future of our children depends on our actions right now, and by ^{uniting} ~~common~~ efforts we are able to make the world a safer place.
