AI'S CONQUEST OF THE WORLD

Since the advent of artificial intelligence, the world has been fast to change. There is a myriad of reasons for its rapidly growing popularity, and just as many implications and issues for us to wrestle with, such as deep fakes. How to deal with them? What are the causes?

There are multifarious reasons for ^{the} "AI ubiquity". I believe it is due to the fact that AI is versatile, ^{free of charge} and can be applied for virtually every task. It also continually ~~progresses~~ advances and has more features. Moreover, it performs simple and routine tasks quicker than people, ~~which makes it~~ thus it is even more desirable to use. ~~In addition~~, It can be ^{applied} used for creative purposes as well.

To grapple with AI technology, some measures could be taken. Firstly, legal penalty could be implemented ^{if there are any} for the instances of AI being used with malicious intents. Secondly, AI usage could be limited or restricted, for example, in schools and universities. Lastly, anti-AI software and applications could be created.

Taking everything aforementioned into consideration, it can be stated that ^{the causes of the} ~~even though~~ AI's taking over of the ^{global} ~~world~~ are clear and straight forward, ~~hence some solutions could be provided, like liability for using it or restrictions on its usage including its applicability~~ and since it is easy to use and gratuitous, hence some solutions could be provided, like restrictions and liability for using it.
