ВАРИАНТ № 2

There have been a lot of concerns in terms of food wasting. It is becoming a huge problem for the modern world. To solve it, main reasons should be discovered and necessary measures should be taken.

To start with, the main reason why people waste food is that they do not consider the amounts of products they purchase. Buying too much leads to food getting spoilt, and people have to throw it away in order not to get poisoned. In addition, people frequently buy something for the first time just to try it, but when it does not meet their expectations they discard it.

Now I would like to propose some measures that would be taken in order to reduce the amount of food wasting. Firstly, people should stop buying products in bulk. In order to do that, they should make a list of necessary products and purchase everything strictly in accordance with it. Secondly, when buying something new, people are expected to do it in small amounts so that less food would be wasted in case it does not match their tastes.

On balance, food wasting is a huge ~~issue~~ issue. ~~It~~ It pollutes the environment and even causes health problems. However, by working together and taking certain measures, it can be solved in the foreseeable future.
