ВАРИАНТ № ~~АЯ-11-2-П~~ 3

Nowadays the sudden and rapid growth of AI popularity is taking place. Although the Artificial Intelligence is considered to be useful and convenient, there is a huge concern behind that.

But what is the reason of AI unlimited usage? Firstly, AI provides a ready-made solution to any task, no matter how advanced it is. Undoubtedly, it enables people to have their assignments done without efforts. Secondly, AI is able to generate any image or other audial or visual content. Last but not least, it ~~provides you a~~ is useful while brainstorming ~~resulting~~ as it provides a list of ideas that acquire to any research.

However, an uncontrollable usage of AI has a negative impact on humanity. Being constantly given ~~with~~ complete answers to every task, people ^{lose} their cognitive skills. This problem could be solved by using AI-detectors at study and work places. The second problem is that AI uses other artists' works as a base for generated images which ~~breaks~~ breaks the author's rights. The solution is ~~prohibition~~ allowing AI to use only stock images. ~~where~~ The key to most ~~many~~ matters connected with AI is to use it to ~~not~~ broaden your horizons, but not let it do everything instead of you.

In conclusion, the AI has pros and cons. Furthermore only rational usage of it would benefit.
